

TACTICAL PISTOL TECHNIQUES FOR THE ZOMBIE APOCALYPSE

June 1, 2013 - El Centro, California 8:30 a.m. – Noon

Location: Border Tactical, 925 North Imperial Avenue, El Centro

Prepare for the Zombie Apocalypse!

This class is for the average shooter that is tired of standing on one spot and sending rounds down range. You will learn how to safely and effectively work from a holster, perform a proper after action drill, perform tactical reloads, clear malfunctions and shoot on the move. Additionally, we will be working in low light and no light, because zombies can see in the dark!

These are zombies we are talking about people, so be prepared for head shots! Lots of head shots!

Experience Level:

This training is geared to be accessible to the beginning to intermediate level shooter. However, even if you are a very experienced shooter, if you have not been introduced to tactical techniques this is the class for you. The Center for Disease Control of your own federal government is concerned about zombies, shouldn't you be too?!

Required Equipment:

All students will need a properly functioning handgun, two or more magazines, a holster and a minimum of 150 rounds of ammunition. A magazine pouch is recommended, but not required. (If you have never used a holster before, make sure you use a stiff, heavy duty belt! Phoenix Uniforms has a wide selection of holster and gun belts in stock.)

Tuition:

\$40.00 per person. Border Tactical members receive a 10% discount on this training. Platinum members may participate at no charge. Cash or checks payable to Bill Smerdon only.

All participants will receive a free Border Tactical Zombie Response Team Patch

Space is limited to 12 shooters - reserve your spot today by emailing Bill at vivaros@live.com. For more information, send an email or call Bill at (760) 554-2333.
